DATE MAILED: 05/11/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/490,867

Applicant(s)

KINNEY, SAM E.

Examiner

Alain L. Bashore

Art Unit

3624

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10, 16-20 and 39-44 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10, 16-20 and 39-44 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-5 are rejected under 35 U.S.C. 101 as non-statutory because the method claims as presented do not claim a technological basis. Without a claimed basis, the claim may be interpreted in an alternative as involving no more than a manipulation of an abstract idea and therefore non-statutory under 35 U.S.C. 101. In contrast, a method claim that includes in the preamble and body of the claim structural / functional interrelationships that are solely by computer (and non-trivial) are considered to have a technological basis [See Ex parte Bowman, 61 USPQ2d 1669, 1671 (Bd. Pat. App. & Inter. 2001) – used only for content and reasoning since not precedential].

There is no technical basis in the preamble.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-10, 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ausubel (383) in view of Rackson et al in further view of Popolo.

Ausube (383) discloses a method, system, and computer program product on computer useable medium of conducting an auction between a plurality of potential bidders where there is generated a sequence of values for a comparative bid parameter (col 4, lines 29-39; col 2, lines 51-67; col 3, lines 1-67; col 4, lines 1-29). Participants of the auction include an originator and at least one potential bidder (col 3, lines 1-5).

The received first bid information represents a first bid that is originally defined in a context of the first bidder (col 4, lines 5-10). Information reflective of the submitted first bid is stored, the stored information enabling a relative comparison of submitted bids (col 6, lines 11-27). Since multiple bidders and multiple bids are transmitted, and second bid information is transmitted.

Ausubel (383) discloses performing a non-linear transformation (col 8, lines 1-19) using a lookup table (col 8, line 5). Since Ausubel (383) teaches performing his demand curve using a look-up table with a non-increasing constraint (i.e. linear), there is disclosed performing a combination of linear, non-linear, and look-up table transformations simultaneously (col 8, lines 15-19).

Ausubel (383) does not explicitly disclose:

a Dutch auction; and,
a third view associated with a second auction item having a second characteristic that is different from said first characteristic.

Rackson et al discloses a Dutch auction (col 2, line 63, col 3, lines 32-40, col 20, lines 64-67; col 21, lines 1-25).

It would have been obvious to one with ordinary skill in the art to modify the auction to Ausubel (383) to include a Dutch auction because Rackson et al teaches multiple formats for auctions utilizing an optimum bidder such as using a Dutch auction format (col 2, lines 46-65).

Popolo discloses a views associated with a second auction item having a second characteristic that is different from said first characteristic (col 1, lines 59-67; col 2, lines 1-7).

It would have been obvious to one with ordinary skill in the art to include a third view associated with a second auction item having a second characteristic that is different from said first characteristic because Popolo teaches viewing different characteristics (units of measures) of various auction items to create new views as needed in auctions (col 2, lines 5-6).

Art Unit: 3624

5. Claims 39-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ausubel (383) in view of Rackson et al in further view of Alaia et al.

Ausube (383) discloses a method, system, and computer program product on computer useable medium of conducting an auction between a plurality of potential bidders where there is generated a sequence of values for a comparative bid parameter (col 4, lines 29-39; col 2, lines 51-67; col 3, lines 1-67; col 4, lines 1-29). Participants of the auction include an originator and at least one potential bidder (col 3, lines 1-5).

The received first bid information represents a first bid that is originally defined in a context of the first bidder (col 4, lines 5-10). Information reflective of the submitted first bid is stored, the stored information enabling a relative comparison of submitted bids (col 6, lines 11-27). Since multiple bidders and multiple bids are transmitted, and second bid information is transmitted.

Ausubel (383) discloses performing a non-linear transformation (col 8, lines 1-19) using a lookup table (col 8, line 5). Since Ausubel (383) teaches performing his demand curve using a look-up table with a non-increasing constraint (i.e. linear), there is disclosed performing a combination of linear, non-linear, and look-up table transformations simultaneously (col 8, lines 15-19).

Ausubel (383) does not explicitly disclose:

Art Unit: 3624

a Dutch auction; and,
sequentially transmitting information reflective of bid sequence values that continues until a second and or third bid is reached.

Rackson et al discloses a Dutch auction (col 2, line 63, col 3, lines 32-40, col 20, lines 64-67; col 21, lines 1-25).

It would have been obvious to one with ordinary skill in the art to modify the auction to Ausubel (383) to include a Dutch auction because Rackson et al teaches multiple formats for auctions utilizing an optimum bidder such as using a Dutch auction format (col 2, lines 46-65).

Alaia et al discloses sequentially transmitting information reflective of bid sequence values that continues until a second and or third bid is reached (fig 10).

It would have been obvious to one with ordinary skill in the art to include sequentially transmitting information reflective of bid sequence values that continues until a second and or third bid is reached because Alaia et al teaches multiple parameters require consideration sequentially for multiple bids (col 12, lines 40-60).

Response to Arguments

6. Applicant's arguments with respect to claims of record have been considered but are moot in view of the new ground(s) of rejection.

Regarding argument of State Street not requiring technical basis such argument is moot because the claims are issue in State Street contained a technical basis. Therefore, State Street did not address the technical requirement now used by the USPTO.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alain L. Bashore whose telephone number is 703-308-1884. The examiner can normally be reached on about 7:00 am to 4:30 pm (Monday thru Thursday).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vincent Millin can be reached on 703-308-1065. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.

Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
